

➔ BUSing-DKAC-I

BUSing® – DAIKIN air conditioning gateway, VRV and SKY series

Allows control by BUSing® of an air conditioning DAIKIN device

- Suitable for interior installations
- Connects to the DAIKIN unit by two wires without polarity
- Controls one DAIKIN unit
- Mounting hidden next to AC device or ceiling integration
- Size: 50 x 55 x 14mm

Description

Gateway suitable for integration of DAIKIN air conditioning system, VRV and SKY series, with the BUSing® system control.

It allows to control set-point temperature, current temperature, function modes (cold, heat, ventilation, drying or automatic) and fan speed (low, medium, high or auto).

This compact device replaces a previous version with DIN rail format (2 modules) and the same reference.

Technical Characteristics

Device Reference	Voltage Supply	Current Consumption	No. AC units Controllable
BUSing-DKAC-I	9-16V DC (BUS)	25mA (BUS)	1
