

➔ BUSing-DKAC-MD

BUSing® - DAIKIN air conditioning gateway - ModBUS

Allows control by BUSing® of an air conditioning DAIKIN device

- Suitable for industrial installations
- Connects to the DAIKIN HVAC by two wires to RS485 BUS
- Controls one outdoor DAIKIN unit
- DIN rail mounted (2 modules)

Description

Gateway suitable for integration of DAIKIN HVAC air conditioning system with the BUSing® system control. It communicates with an outdoor DAIKIN air conditioning unit through a 2-wire direct connection to RS485 BUS. It allows to control set-point temperature, current temperature, function modes (cold, heat, ventilation, drying or auto-matic) and fan speed (low, medium, high or auto).

Technical Characteristics

Device Reference	Voltage Supply	Current Consumption	No. AC units Controllable
BUSing-DKAC-MD	9-16V DC (BUS)	100mA (BUS)	1
