

➔ BUSing-PNAC

BUSing® – PANASONIC® air conditioning gateway, ECOi and PACi series

Allows control by BUSing® of an air conditioning PANASONIC® device

- Suitable for domestic installations
- Direct connection of the gateway to the PANASONIC® unit
- Controls one PANASONIC® unit
- Mounting hidden next to AC device or ceiling integration
- Size: 42 x 42 x 15mm

Description

Gateway for integration of PANASONIC®, ECOi and PACi series, air conditioning system with the BUSing® system control.

It allows to individually control the setpoint temperature, the measured temperature, the operation mode of the units (cooling, heating, ventilation, drying or automatic) and the ventilation speed (low, medium, high).

It is connected directly to the air conditioning unit through a 2 wire connection with polarity.

Technical Characteristics

Device Reference	Voltage Supply	Current Consumption	No. AC units Controllable
BUSing-PNAC	9–16V DC (BUS)	12mA (BUS)	1
